		List of Oral / Poster:	session
Entry No.	Abstract No.	Type of Session	Abstract title registered
200003	047-2	Oral Session	Placement of catheters without magnetic sensors in the coronary sinus without fluoroscopy guidance: Feasibility and safety evaluation
200005	08-3	Oral Session	Potential predictors for improvement of isolated diastolic function in patients with paroxysmal atrial fibrillation underwent pulmonary vein isolation.
200007	027-1	Oral Session	Diagnostic Performance of Machine Learning of Automatic Microvolt-level Measurement on 12-lead Electrocardiography to Distinguish Takotsubo Syndrome and Acute Anterior Myocardial Infarction
200008	033-2	Oral Session	Attenuation of amplitude of J wave on psychiatric drugs.
200009	P6-2	Chaired Poster Session	Long-term Outcome after Catheter Ablation for Patients with Persistent and Long-standing Atrial Fibrillation by Using a 14-days, Leadless, Adhesive Patch Electrocardiographic Monitor
200010	09-4	Oral Session	Impact of radiofrequency application power on cavotricuspid isthmus ablation with a fixed target ablation index
200011	SY8-3	Symposium: 左心耳をターゲットとした脳梗底予防の新たなる治療戦略	Novel Hybrid Therapy with Catheter Ablation and Percutaneous Left Atrial Appendage Occulusion in Patients with Atrial Fibrillation
200012	057-5	Oral Session	Association of Premature Atrial Contraction Just After Procedure with the Outcome of Atrial Fibrillation Ablation
200013	025-2	Oral Session	Bioinformatics analysis of autophagy in atrial fibrillation
200014	015-3	Oral Session	Double Clip Strategy: Could it be a novel treatment for atrial functional mitral regurgitation?
200015	035-2	Oral Session	Hot Balloon Ablation with Surface Temperature Monitoring increase success rate of Balloon only Pulmonary Vein Isolation
200017	036-5	Oral Session	One-year Outcome of Wide-area Pulmonary Vein Isolation Using the Visually Guided Laser Balloon for Atrial Fibrillation.
200019	020-3	Oral Session	Initial results of ablation by CARTO FINDER for P-AF
200020	065-5	Oral Session	Correlates of sleep disordered breathing and Cheyne-Stokes respiration in patients with atrial fibrillation undergoing pulmonary vein isolation
200021	P4-5	Chaired Poster Session	Contact dermatitis associated with wearable cardioverter-defibrillator
200022	SY3-5	Symposium:アプレーション時代における不整脈外科治療 – 外科医・内科医のそれぞれの視点から望むものー	The ideal managements of the left ventricular assist device recipients with ventricular tachycardia, in whom, when, and how to perform ablation
200023	DS5-2	Device Summit : Remote monitoring in the future	The Role of the Device Nurse in Cardiovascular Implantable Electric Devices' Managements for Patients-centered Care in Remote Monitoring Era
200024	025-1	Oral Session	Protective effects of eicosapentaenoic acid against saturated fatty acids-caused electrical remodeling in cardiomyocytes
200025	P10-5	Chaired Poster Session	Atrial Flutter and Atrial tachycardia post Operation of Cox Maze
200026	049-4	Oral Session	Usefulness of Novel Phrenic Nerve Monitoring for Prevention of Phrenic Nerve Injury During SVC Isolation
200027	053-5	Oral Session	The Relationship between Heart Rate and Premature Atrial Contraction after Cryoballon ablation for Paroxysmal Atrial Fibrillation
200028	035-3	Oral Session	Radiofrequency current versus balloon-based ablations for patients with atrial fibrillation: Insights into procedural data and efficacy from propensity score-matched cohort analysis
200029	055-4	Oral Session	Impact of Very Early Recurrence of Atrial Fibrillation after Cryoballoon Ablation
200030	P5-5	Chaired Poster Session	Differences in Background and Prognosis of patients implanted CRTP/CRTD -a single center study-
200031	022-5	Oral Session	The correlation between local impedance drop and catheter contact in clinical practice
200032	063-4	Oral Session	Additional touch-up ablation in the middle area of posterior wall for posterior wall isolation in patients with persistent atrial fibrillation
200033	044-5	Oral Session	Long-term outcome of adenosine-induced atrial fibrillation after atrial fibrillation ablation: A propensity score matching analysis
200034	P3-6	Chaired Poster Session	An Ultrasound-guided Creation of the Intermuscular Pocket for a Subcutaneous Implantable Cardioverter-defibrillator
200035	020-1	Oral Session	Comparisons of The Electrophysiological Features in Epicardial Connection and Gap Connection Using an Ultra-High- Density Mapping System
200036	057-2	Oral Session	What is true recurrence after catheter ablation of persistent atrial fibrillation?
200037	P6-4	Chaired Poster Session	The feature of voltage map with difficult first-pass pulmonary vein isolation
200038	023-1	Oral Session	Early Recurrence were Important Factors Related to Late Recurrence after Multiple Ablations for Atrial Fibrillation
200039	P9-1	Chaired Poster Session	Low-power long-duration ablation is better than high-power short-duration ablation guided by unipolar signal modification against the septopulmonary bundle during catheter ablation of atrial fibrillation
200040	AS3-2	Ablation Summit:サルコベニア・フレイルそして併存疾患をもつ高齢患者のアプレーション	Long-Term Clinical Outcome and Safety of Catheter Ablation for Atrial Fibrillation in Possible Sarcopenia Patients
200041	037-4	Oral Session	Analysis of Lesions Found by Chance on Computed Tomography before Atrial Fibrillation Ablation
200042	P7-5	Chaired Poster Session	Impact of catheter ablation on left ventricular diastolic function grade and left atrial reverse remodeling in patients with paroxysmal atrial fibrillation
200043	060-4	Oral Session	Utility of Arrhythmic Rehabilitation and Exercise Tolerance in Patients Undergoing Catheter Ablation for Atrial Fibrillation
200044	SY2-4	Symposium: 先天性心疾患に伴う離治性不整脈: 新技術の応用	Heightened expectations for Pulsed Field Ablation for intractable arrhythmias associated with congenital heart disease
200045	P8-6	Chaired Poster Session	Predictor of the recurrence over 3 years after catheter ablation for paroxysmal atrial fibrillation
200046	P3-1	Chaired Poster Session	Comparison of the delayed electrical activation regions between intrinsic conduction and right ventricular pacing in patients with cardiac resynchronization therapy
200048	SY10-4	Symposium:新しい心不全治療薬の抗不整脈作用について	Sodium-Glucose Cotransporter 2 Inhibitors not only suppress recurrence after atrial fibrillation ablation but also cause atrial reverse remodeling
200049	048-4	Oral Session	Prognostic impact of plasma xanthine oxidoreductase activity in patients with chronic heart failure with atrial fibrillation
200050	017-3	Oral Session	A Novel Style of an Outpatient Clinic utilizing a Combination of Telehealth and Real-Time ECG monitoring in Patients after the Catheter Ablation
200051	039-1	Oral Session	Optimize manual atrioventricular synchronization in patients with VDD leadless pacemakers

Entry No.	Abstract No.	Type of Session	Abstract title registered
200052	05-5	Oral Session	Different Kinetics of Activated Clotting Time among Uninterrupted Oral Anticoagulants during Catheter Ablation Procedure
200053	03-2	Oral Session	Prognostic significance of natriuretic peptide levels in atrial fibrillation patients undergoing catheter ablation
200054	SY2-3	Symposium: 先天性心疾患に伴う難治性不整脈: 新技術の応用	Catheter ablation for atrioventricular nodal reentrant tachycardia in patients with transposition of the great arteries after atrial switch operation.
200055	P1-1	Chaired Poster Session	Fetal and Infant Lethal Ventricular Arrhythmias are Common in Cardiac Calmodulinopathy
200056	015-4	Oral Session	Transition from WATCHMAN to WATCHMAN FLX for percutaneous left atrial appendage occlusion
200057	045-2	Oral Session	Utility of Coherent Mapping for Identifying Localized Reentry
200058	03-4	Oral Session	Impact of Heart Rate on Adverse Events in Patients with Non-Valvular Atrial Fibrillation: The J-RHYTHM Registry
200059	012-2	Oral Session	The characteristics of abnormal ventricular signature in ischaemic and non-ischaemic cardiomyopathies
200060	P13-3	Chaired Poster Session	Importance of additional ablation other than pulmonary vein isolation for the patients of atrial fibrillation with hypertrophic cardiomyopathy.
200061	SY5-5	Symposium:集中治療と不整脈管理	Bailout ablation for refractory ventricular tachyarrhythmias in patients with percutaneous left ventricular assist devices
200062	SY12-1	Symposium:特発性心室期外収縮/心室頻拍のアプレーション戦略	How to Use Bipolar and Unipolar Electrograms for Selecting Successful Ablation Sites of Ventricular Premature Contractions
200063	O50-5	Oral Session	Daily Alcohol Consumption is Risk of New Onset Atrial Fibrillation
200065	054-4	Oral Session	Higher Power Could Achieve Greater Local Impedance Drop and Shorter Ablation Time Compared to the Conventional Power in Radiofrequency Ablation of Atrial Fibrillation
200066	06-1	Oral Session	Efficacy and Safety of Catheter Ablation Therapy for Atrial Fibrillation in Heart Failure Patients: A Subanalysis from ALCOHOL-AF Study
200067	04-3	Oral Session	Significant Conduction Delay around Right Ventricular Outflow Tract Contributes to Complete Right Bundle Block Morphology in Brugada Syndrome
200068	031-2	Oral Session	Very Long-term Follow up of Catheter Ablation for Atrial Fibrillation in Patients with Tachycardia-Bradycardia Syndrome: over 15 years follow-up
200069	048-1	Oral Session	Low atrial natriuretic peptide to brain natriuretic peptide ratio was associated with long-term prognosis of heart failure in patients with atrial fibrillation ablation
200070	SY12-3	Symposium:特発性心室期外収縮/心室頻拍のアプレーション戦略	Tips and Tricks in Ablation of Para-Hisian Ventricular Arrhythmias -How to Approach Ventricular Arrhythmias with QRS Morphology Change Following Ablation-
200071	028-1	Oral Session	How early afterdepolarization triggers lethal arrhythmias in long QT syndrome type 2: a computational study
200072	019-3	Oral Session	Left Atrial Volume Index Predicts AF Duration Detected by Continuous Monitoring, Suggesting the AF Detection Marker.
200073	YIA5	Young Investigator Award Competition	Characteristics and outcomes of patients with non-ischemic out-of-hospital cardiopulmonary arrest at night : Multicenter Registry from Tokyo CCU Network
200073	YIA5 027-2	Young Investigator Award Competition  Oral Session	
			Multicenter Registry from Tokyo CCU Network
200074	027-2	Oral Session	Multicenter Registry from Tokyo CCU Network  Development of Precise Genetic Prognostic Model for Hereditary Arrhythmia Disease Using Machine Learning
200074	O27-2 SY9-4	Oral Session  Symposium: TIPS of Catheter ablation for radiation reduction	Multicenter Registry from Tokyo CCU Network  Development of Precise Genetic Prognostic Model for Hereditary Arrhythmia Disease Using Machine Learning  New Software to Create 3D-Left Atrial Geometry Using Ultrasound  Efficacy of conduction system pacing for cardiac resynchronization on volume response in heart failure and left bundle
200074 200075 200076	O27-2 SY9-4 DS1-2	Oral Session  Symposium: TIPS of Catheter ablation for radiation reduction  Device Summit: New era for cardiac pacing in heart failure	Multicenter Registry from Tokyo CCU Network  Development of Precise Genetic Prognostic Model for Hereditary Arrhythmia Disease Using Machine Learning  New Software to Create 3D-Left Atrial Geometry Using Ultrasound  Efficacy of conduction system pacing for cardiac resynchronization on volume response in heart failure and left bundle branch block: Comparison with biventricular pacing
200074 200075 200076 200077	O27-2 SY9-4 DS1-2 P10-1	Oral Session  Symposium: TIPS of Catheter ablation for radiation reduction  Device Summit: New era for cardiac pacing in heart failure  Chaired Poster Session	Multicenter Registry from Tokyo CCU Network  Development of Precise Genetic Prognostic Model for Hereditary Arrhythmia Disease Using Machine Learning  New Software to Create 3D-Left Atrial Geometry Using Ultrasound  Efficacy of conduction system pacing for cardiac resynchronization on volume response in heart failure and left bundle branch block: Comparison with biventricular pacing  Premature atrial contraction on Holter ECG predicts the recurrence of atrial fibrillation after catheter ablation  A Novel Catheter Ablation Strategy for Non-Paroxysmal Atrial Fibrillation with Combined Cryoballoon, Radiofrequency
200074 200075 200076 200077 200078	027-2 SY9-4 DS1-2 P10-1 063-2	Oral Session  Symposium: TIPS of Catheter ablation for radiation reduction  Device Summit: New era for cardiac pacing in heart failure  Chaired Poster Session  Oral Session	Multicenter Registry from Tokyo CCU Network  Development of Precise Genetic Prognostic Model for Hereditary Arrhythmia Disease Using Machine Learning  New Software to Create 3D-Left Atrial Geometry Using Ultrasound  Efficacy of conduction system pacing for cardiac resynchronization on volume response in heart failure and left bundle branch block: Comparison with biventricular pacing  Premature atrial contraction on Holter ECG predicts the recurrence of atrial fibrillation after catheter ablation  A Novel Catheter Ablation Strategy for Non-Paroxysmal Atrial Fibrillation with Combined Cryoballoon, Radiofrequency and Marshall-vein Ethanol Ablations
200074 200075 200076 200077 200078 200079	027-2 SY9-4 DS1-2 P10-1 063-2	Oral Session  Symposium: TIPS of Catheter ablation for radiation reduction  Device Summit: New era for cardiac pacing in heart failure  Chaired Poster Session  Oral Session  Oral Session	New Software to Create 3D-Left Atrial Geometry Using Ultrasound  Efficacy of conduction system pacing for cardiac resynchronization on volume response in heart failure and left bundle branch block: Comparison with biventricular pacing  Premature atrial contraction on Holter ECG predicts the recurrence of atrial fibrillation after catheter ablation  A Novel Catheter Ablation Strategy for Non-Paroxysmal Atrial Fibrillation with Combined Cryoballoon, Radiofrequency and Marshall-vein Ethanol Ablations  The effect of remote monitoring depends on management staff and system status
200074 200075 200076 200077 200078 200079	027-2 SY9-4 DS1-2 P10-1 063-2 019-4	Oral Session  Symposium: TIPS of Catheter ablation for radiation reduction  Device Summit: New era for cardiac pacing in heart failure  Chaired Poster Session  Oral Session  Oral Session  Oral Session	Multicenter Registry from Tokyo CCU Network  Development of Precise Genetic Prognostic Model for Hereditary Arrhythmia Disease Using Machine Learning  New Software to Create 3D-Left Atrial Geometry Using Ultrasound  Efficacy of conduction system pacing for cardiac resynchronization on volume response in heart failure and left bundle branch block: Comparison with biventricular pacing  Premature atrial contraction on Holter ECG predicts the recurrence of atrial fibrillation after catheter ablation  A Novel Catheter Ablation Strategy for Non-Paroxysmal Atrial Fibrillation with Combined Cryoballoon, Radiofrequency and Marshall-vein Ethanol Ablations  The effect of remote monitoring depends on management staff and system status  Impact on early recurrence of atrial fibrillation after pulmonary vein isolation plus roof line block using cryoballoon.  Impact of various ablation conditions on lesion characteristics at a constant ablation index value: Ex vivo experimental
200074 200075 200076 200077 200078 200079 200080 200081	O27-2 SY9-4 DS1-2 P10-1 O63-2 O19-4 O56-4 O10-4	Oral Session  Symposium: TIPS of Catheter ablation for radiation reduction  Device Summit: New era for cardiac pacing in heart failure  Chaired Poster Session  Oral Session  Oral Session  Oral Session  Oral Session	Development of Precise Genetic Prognostic Model for Hereditary Arrhythmia Disease Using Machine Learning  New Software to Create 3D-Left Atrial Geometry Using Ultrasound  Efficacy of conduction system pacing for cardiac resynchronization on volume response in heart failure and left bundle branch block: Comparison with biventricular pacing  Premature atrial contraction on Holter ECG predicts the recurrence of atrial fibrillation after catheter ablation  A Novel Catheter Ablation Strategy for Non-Paroxysmal Atrial Fibrillation with Combined Cryoballoon, Radiofrequency and Marshall-vein Ethanol Ablations  The effect of remote monitoring depends on management staff and system status  Impact on early recurrence of atrial fibrillation after pulmonary vein isolation plus roof line block using cryoballoon.  Impact of various ablation conditions on lesion characteristics at a constant ablation index value: Ex vivo experimental study  Guideline-based Evaluation of Left Ventricular Diastolic Dysfunction Is Associated with Atrial Low Voltage Area and
200074 200075 200076 200077 200078 200079 200080 200081	027-2 SY9-4 DS1-2 P10-1 063-2 019-4 056-4 010-4 P9-2	Oral Session  Symposium: TIPS of Catheter ablation for radiation reduction  Device Summit: New era for cardiac pacing in heart failure  Chaired Poster Session  Oral Session  Oral Session  Oral Session  Oral Session  Chaired Poster Session	Development of Precise Genetic Prognostic Model for Hereditary Arrhythmia Disease Using Machine Learning  New Software to Create 3D-Left Atrial Geometry Using Ultrasound  Efficacy of conduction system pacing for cardiac resynchronization on volume response in heart failure and left bundle branch block: Comparison with biventricular pacing  Premature atrial contraction on Holter ECG predicts the recurrence of atrial fibrillation after catheter ablation  A Novel Catheter Ablation Strategy for Non-Paroxysmal Atrial Fibrillation with Combined Cryoballoon, Radiofrequency and Marshall-vein Ethanol Ablations  The effect of remote monitoring depends on management staff and system status  Impact on early recurrence of atrial fibrillation after pulmonary vein isolation plus roof line block using cryoballoon.  Impact of various ablation conditions on lesion characteristics at a constant ablation index value: Ex vivo experimental study  Guideline-based Evaluation of Left Ventricular Diastolic Dysfunction Is Associated with Atrial Low Voltage Area and Arrhythmia Recurrence in Paroxysmal Atrial Fibrillation Patients Undergoing Catheter Ablation  The Impact of Atrial Fibrillation on the Cognitive Deterioration in Heart Failure Patients -from the KUNIUMI Registry
200074 200075 200076 200077 200078 200079 200080 200081 200082	027-2 SY9-4 DS1-2 P10-1 063-2 019-4 056-4 010-4 P9-2	Oral Session  Symposium: TIPS of Catheter ablation for radiation reduction  Device Summit: New era for cardiac pacing in heart failure  Chaired Poster Session  Oral Session  Oral Session  Oral Session  Chaired Poster Session  Oral Session  Oral Session  Oral Session	Development of Precise Genetic Prognostic Model for Hereditary Arrhythmia Disease Using Machine Learning  New Software to Create 3D-Left Atrial Geometry Using Ultrasound  Efficacy of conduction system pacing for cardiac resynchronization on volume response in heart failure and left bundle branch block: Comparison with biventricular pacing  Premature atrial contraction on Holter ECG predicts the recurrence of atrial fibrillation after catheter ablation  A Novel Catheter Ablation Strategy for Non-Paroxysmal Atrial Fibrillation with Combined Cryoballoon, Radiofrequency and Marshall-vein Ethanol Ablations  The effect of remote monitoring depends on management staff and system status  Impact on early recurrence of atrial fibrillation after pulmonary vein isolation plus roof line block using cryoballoon.  Impact of various ablation conditions on lesion characteristics at a constant ablation index value: Ex vivo experimental study  Guideline-based Evaluation of Left Ventricular Diastolic Dysfunction Is Associated with Atrial Low Voltage Area and Arrhythmia Recurrence in Paroxysmal Atrial Fibrillation Patients Undergoing Catheter Ablation  The Impact of Atrial Fibrillation on the Cognitive Deterioration in Heart Failure Patients -from the KUNIUMI Registry Acute Cohort.  Clinical outcomes after one-year treatments with cryoballoon ablation for persistent atrial fibrillation at Ise Red Cross
200074 200075 200076 200077 200078 200079 200080 200081 200082 200083	027-2 SY9-4 DS1-2 P10-1 063-2 019-4 056-4 010-4 P9-2 07-2 P11-1	Oral Session  Symposium: TIPS of Catheter ablation for radiation reduction  Device Summit: New era for cardiac pacing in heart failure  Chaired Poster Session  Oral Session  Oral Session  Oral Session  Chaired Poster Session  Oral Session  Chaired Poster Session  Oral Session  Oral Session	Development of Precise Genetic Prognostic Model for Hereditary Arrhythmia Disease Using Machine Learning  New Software to Create 3D-Left Atrial Geometry Using Ultrasound  Efficacy of conduction system pacing for cardiac resynchronization on volume response in heart failure and left bundle branch block: Comparison with biventricular pacing  Premature atrial contraction on Holter ECG predicts the recurrence of atrial fibrillation after catheter ablation  A Novel Catheter Ablation Strategy for Non-Paroxysmal Atrial Fibrillation with Combined Cryoballoon, Radiofrequency and Marshall-vein Ethanol Ablations  The effect of remote monitoring depends on management staff and system status  Impact on early recurrence of atrial fibrillation after pulmonary vein isolation plus roof line block using cryoballoon. 		List of Oral / Poster	session
Entry No.	Abstract No.	Type of Session	Abstract title registered
200097	064-5	Oral Session	Efficacy and Feasibility of Local Impedance-guided Superior Vena Cava Isolation
200098	061-5	Oral Session	Obstructive and Central Sleep Apnea Differently Develop Left Atrial Electrical and Structural Remodeling in Paroxysmal Atrial Fibrillation
200099	057-3	Oral Session	Significance of Mitral L Wave to Predict Late Recurrence of Atrial Fibrillation after Radiofrequency Catheter Ablation
200100	P6-6	Chaired Poster Session	New Normal Definition of Left-Atrial Microelectrode-derived Bipolar Voltage Recorded by QDOT Micro catheter: Implication for Efficacy of Pulmonary Vein Isolation
200101	P1-2	Chaired Poster Session	Long-term outcomes after an epicardial ventricular tachycardia ablation in structural and non-structural heart disease
200103	046-5	Oral Session	A Strong Association between de novo Left Atrial Macro-reentrant Tachycardia and Severe Low-voltage Area
200104	056-1	Oral Session	Feasibility and Efficacy of the Cross Over Technique for Left Atrial Posterior Wall Isolation Using the Cryoballoon Catheter in Patients with Persistent Atrial Fibrillation
200105	09-5	Oral Session	The Time to Reach the Minimum Freezing Temperature during Cryoablation is a Predictor of First-pass Conductional Block of Cavotricuspid Isthmus
200106	SY8-2	Symposium: 左心耳をターゲットとした脳梗應予防の新たなる治療戦略	LAA management and mid-term results
200107	018-4	Oral Session	Pitfalls of implantable loop recorders in patients with unknown syncope - no traces during ventricular fibrillation terminated by DC shock -
200108	05-4	Oral Session	Feasibility of temporary switching from factor Xa inhibitors to dabigatran in the perioperative period of catheter ablation for atrial fibrillation.
200109	05-3	Oral Session	Impact of low-dose or under-dose direct oral anticoagulant on coagulation and fibrinolytic markers in patients with atrial fibrillation
200110	014-1	Oral Session	Clinical impact of circadian patterns in electrical storm
200111	063-1	Oral Session	Impact of Long Superior Vena Cava Sleeve as a Non-Pulmonary Vein Trigger in Persistent and Long-Standing Persistent Atrial Fibrillation.
200112	050-4	Oral Session	Impact of serum alkaline phosphatase on new appearance of atrial fibrillation
200113	YIA6	Young Investigator Award Competition	Histological Factors Associated with Atrial Bipolar Voltage in Patients with Atrial Fibrillation
200114	062-1	Oral Session	Stiff and calcified left atrium; unrecognized atrial remodeling after atrial fibrillation ablation
200115	012-5	Oral Session	Regulation for Patient Safety in Stereotactic Body Radiotherapy for Ventricular Tachycardia
200116	060-5	Oral Session	Clinical significance of the decreased coefficient of variance of R-R interval after pulmonary vein isolation in patients with atrial fibrillation
200117	AS1-3	Ablation Summit : Mechanism and Therapy of Ventricular Tachycardia Derived from New Mapping System	Differentiation of surface of interest using temporal and spatial pacemap parameters for scar-related ventricular tachycardia
200118	043-1	Oral Session	Silent Atrial Fibrillation after Pulmonary Vein Isolation: Impact of Baseline Burden and Symptoms from Patient Reported Outcomes
200119	SY12-2	Symposium:特殊性心室期外収縮/心室頻拍のアプレーション戦略	An Anatomical Approach Guided by the Over-the-Wire Microelectrodes Catheter for Outflow Tract Ventricular Arrhythmia: Importance of Coronary Venous Branch Mapping.
200120	017-1	Oral Session	Impact of catheter ablation on the efficacy of atrial antitachycardia pacing for atrial tachyarrhythmias
200122	030-5	Oral Session	P-wave duration at 3 months after catheter ablation for persistent atrial fibrillation is associated with recurrence
200123	P7-1	Chaired Poster Session	Predictors of prognosis and recurrence of atrial fibrillation after pulmonary vein isolation in patients with heart failure
200124	P4-6	Chaired Poster Session	Sheath shape pattern during leadless pacemaker implantation
200125	P13-2	Chaired Poster Session	Redo Ablation Strategies for Non-Pulmonary Vein-Dependent Atrial Fibrillation: Non-Pulmonary Vein Foci Ablation Versus Empirical Box and Superior Vena Cava Isolation
200126	P13-1	Chaired Poster Session	Impact of Left Atrial Appendage Enhancement Pattern with Cardiac Computed Tomography and Flow Velocity in Patients with Atrial Fibrillation
200128	064-1	Oral Session	Relationship between effective refractory period and inducibility of atrial fibrillation of the superior vena cava after pulmonary vein isolation
200129	052-4	Oral Session	Impact on the conduction of Bachmann's bundle by roof line ablation by a 28-mm cryoballoon
200130	049-2	Oral Session	Utility of A Perclose ProGlide for the Prevention of the Femoral Vein Bleeding Undergoing Catheter Ablation for Atrial Fibrillation
200131	SY10-2	Symposium:新しい心不全治療薬の抗不整脈作用について	Empagliflozin suppresses human epicardial pre-adipocyte differentiation and maturation and improves paracrine secretome profile
200132	P10-3	Chaired Poster Session	Safety and outcomes of single-operator cryoablation of atrial fibrillation
200133	SY6-5	Symposium : Challenges and Pitfalls of His-Purkinje Conduction System Pacing	The usefulness of standard stylet-driven lead and new delivery system in left bundle branch area pacing.
200134	054-5	Oral Session	Pulmonary Vein Isolation with 50-W High-power and Short-duration Ablation Strategy for Persistent Atrial Fibrillation: Outcomes of 1-Year Follow Up
200135	DS1-3	Device Summit : New era for cardiac pacing in heart failure	Comparison of the effects of complete and incomplete left bundle branch pacing and deep septal pacing on cardiac electrical and mechanical dyssynchrony.
200136	019-2	Oral Session	The Association between IHB burden and Left Atrial Remodeling Using a Home Blood Pressure Monitor in Patient with AF
200137	025-5	Oral Session	Ablation characteristics and the incidence of steam pop of a novel, surface temperature control ablation system(QDOT MICRO) in an ex vivo experimental model
200139	030-3	Oral Session	Right Atrial Low Voltage Zone as a Novel Predictor of Sinus Node Dysfunction in Patients with Non-paroxysmal Atrial Fibrillation
200140	042-4	Oral Session	Clinical Outcomes and Changes of paced QRS duration in Patients with Delayed Echocardiographic Response to Cardiac Resynchronization Therapy
200141	DS3-4	Device Summit : 20 years from MADIT-II	Ventricular Arrhythmia Events in Heart Failure Patients with Cardiac Resynchronization Therapy with or without Defibrillator in Primary Prevention
200142	047-3	Oral Session	Early Experience and 1-year Outcome of Atrial Fibrillation Ablation with Reduction of Radiation Exposure Using Contact Force Sensing Catheter and Intracardiac Echo
200143	033-3	Oral Session	Impact of fragmented QRS on twelve-lead ECG for prognosis in cardiac sarcoidosis from nationwide survey.
200144	021-2	Oral Session	Ablation Strategy for Complex Left Atrial Tachycardia Analyzed by High-Resolution Mapping System

200386	029-4	Oral Session	Patient-Tailored Strategy Guided by Real-time Phase Mapping in Catheter Ablation for Patients with Non-paroxysmal Atrial Fibrillation
200387	043-5	Oral Session	Failed Cardioversion during immediate post-operative period is a Predictor of Late Recurrence after Atrial Fibrillation Ablation.
200388	061-3	Oral Session	Gender difference in atrial voltage and structural remodeling: Evidence from high-density voltage mapping and atrial biopsy
200389	029-5	Oral Session	Focal and rotational drivers identified by a novel automated algorithm in patients with persistent atrial fibrillation
200390	036-2	Oral Session	Clinical feasibility of high power short duration strategy at the sites adjacent to esophagus during Laser balloon based pulmonary vein isolation
200391	042-2	Oral Session	Postoperative course of cardiac resynchronization therapy in our hospital conducted in the indication as the Block HF trial
200392	035-5	Oral Session	Comparison of Clinical Outcome among Various Balloon Systems for Paroxysmal Atrial Fibrillation: Cryo vs. Hot vs. Laser.
200393	034-2	Oral Session	Risk Factors of Re-bleeding after Hemostasis Using Venous Vascular Closure System in Cases of Catheter Ablation for Atrial Fibrillation
200394	020-4	Oral Session	The Assessment of Dominant Frequency during Atrial Fibrillation: Comparison to Complex Fractionated Atrial Electrograms and Local Atrial Activated Signals
200395	035-4	Oral Session	The Efficacy and Safety of Third-Generation Laser Balloon based Pulmonary Vein Isolation for the Patients with Paroxysmal Atrial Fibrillation
200396	011-3	Oral Session	Left ventricular endocardial ablation for ventricular arrhythmias originated from the left ventricular summit: Is it enough or not?
200397	P12-5	Chaired Poster Session	The Association between Brockenbrough Site and Requirement of Touch-up Ablation Following Pulmonary Vein Isolation Using Balloon Devices
200398	017-4	Oral Session	Consideration of the usefulness of 7-day Holter monitoring after ablation of atrial fibrillation
200399	014-3	Oral Session	Initial clinical experience with a new automated anti-tachycardia pacing algorithm
200400	DS5-5	Device Summit : Remote monitoring in the future	Artificial intelligence to detect noise events in arrhythmic events of remote monitoring data
200402	051-3	Oral Session	Effect of catheter ablation of premature ventricular contractions on renal function
200403	065-3	Oral Session	Usefulness of general anesthesia with i-gel for catheter ablation of atrial fibrillation compared to moderate/deep sedation
200404	P8-4	Chaired Poster Session	Lower Body Surface Area Predict the Extent of Left Atrial Low Voltage Zone and Arrhythmia Recurrence in Patients with Persistent Atrial Fibrillation
200405	046-4	Oral Session	Not Only Conduction Gaps at Incisional Lines but Also de novo Atrial Substrates Are Associated with Post-surgical Atrial Tachycardia
200406	BS3-2	Basic Researc Summit:不整脈疾患における遺伝子異常と機能解析・疾患モデル	Applications of human iPS cell model for inherited arrhythmias
200407	055-3	Oral Session	Short-term Results of Cryoballoon ablation for Persistent Atrial Fibrillation in Japanese.
200408	015-2	Oral Session	Clinical experience of lead extraction procedure using an audiovisualtelesupport system.
200409	P4-1	Chaired Poster Session	Tricuspid valve chordae tendineae rupture by leadless pacemaker system implantation
200410	038-3	Oral Session	Hemodynamic Study of VVI Pacemaker in Atrial Fibrillation Patients
200411	AS1-6	Ablation Summit : Mechanism and Therapy of Ventricular Tachycardia Derived from New Mapping System	Wave velocity mapping as a potential innovative tool for identification of ventricular tachycardia ablation targets
200412	016-1	Oral Session	Does shortening QRS width always correlate with hemodynamic improvement in CRT?
200413	P8-3	Chaired Poster Session	Efficacy of combined antiarrhythmic drug therapy after catheter ablation for atrial fibrillation in patients with hypertrophic cardiomyopathy
200414	P8-5	Chaired Poster Session	Feasibility of lower value Ablation Index-guided Pulmonary Vein Isolation in patients with Atrial Fibrillation
200415	SY9-2	Symposium: TIPS of Catheter ablation for radiation reduction	Zero fluoroscopic catheter ablation without a lead apron.
200416	040-5	Oral Session	Assessment of efficacy of left bundle branch area pacing compared with right ventricular apical and septal pacing using with two-dimensional speckle tracking
200417	P9-6	Chaired Poster Session	Outcomes of Catheter Ablation in Octogenarian Patients with Atrial fibrillation.
200418	P9-5	Chaired Poster Session	Additional Cryoablation on the Residual Pulmonary Vein Connections Detected by High-Resolution Mapping
200419	P12-3	Chaired Poster Session	Radiofrequency energy to create transmural lesions for AF ablation may depend on AF severity.
200420	P3-5	Chaired Poster Session	Curious VA prolongation after Ventricular Overdrive Pacing during fast-slow Atrioventricular Nodal Reentrant Tachycardia
200421	02-5	Oral Session	Safety and Efficiency of the Potential-Guided Cryoablation for Slow-Fast Atrioventricular Nodal Reentrant Tachycardia

		List of Oral / Poster :	session
Entry No.	Abstract No.	Type of Session	Abstract title registered
200422	P7-3	Chaired Poster Session	The Procedural Characteristics of Left Atrial Posterior Wall Isolation by Using Ablation Index for Patients with Persistent Atrial Fibrillation
200423	05-1	Oral Session	Difference among oral anticoagulants for left atrial thrombus in patients before catheter ablation for atrial fibrillation
200424	058-5	Oral Session	Exploratory Identification of Recurrence Risk after Cryoablation for Atrial Fibrillation Using Machine Learning Methods.
200425	051-2	Oral Session	Relationship between characteristics of 12-lead electrocardiogram in para-hisian Premature ventricular contractions (PVC) and the results of ablation
200426	SY10-3	Symposium: 新しい心不全治療薬の抗不整脈作用について	SGLT2 inhibitor suppresses the mitochondrial reactive oxygen species generation and mitigates atrial fibrillation inducibility in diabetic rats
200427	062-2	Oral Session	The effect of catheter ablation for atrial fibrillation with functional mitral regurgitation.
200428	023-3	Oral Session	High Threshold of Internal Defibrillation Prior to Atrial Fibrillation Ablation Predicts Recurrence in the Long-Term Follow-Up.
200429	P3-2	Chaired Poster Session	Left Bundle Branch Block and Early Implantation Is Associated with Responders of Cardiac Resynchronization Therapy
200430	027-4	Oral Session	The Establishment of 3D printer model to assess contact force of cryoballoon ablation
200431	024-4	Oral Session	Indication of catheter ablation for focal ventricular arrhythmia associated tetralogy of Fallot
200432	038-1	Oral Session	Incidence and predictors for heart failure hospitalization in patients with leadless pacemaker -From the analysis of Micra CT registry-
200433	039-4	Oral Session	Differences in Paced QRS Duration between Septal and Non-Septal Implantation of Micra Leadless Pacemaker
200434	029-3	Oral Session	A novel method for identifying left atrial breakthrough site of Bachmann's bundle
200435	P6-5	Chaired Poster Session	Higher Mean Heart Rate is Associated with Left Ventricular Reverse Remodeling after Catheter Ablation in Patients with Persistent Atrial Fibrillation
200436	023-2	Oral Session	Evaluation of recurrence after catheter ablation in patients with non-paroxysmal atrial fibrillation
200437	YIA2	Young Investigator Award Competition	Novel CPVT-associated calmodulin mutation activating RyR2 channels causes robust arrhythmogenicity in iPS cell model
200438	028-2	Oral Session	Epicardial adipose tissue remodeling evoked by extracellular vesicles released from atrial myocytes
200439	034-3	Oral Session	Usefulness of Perclose Proglide for Hemostasis after Catheter Ablation
200440	010-5	Oral Session	Optimization of ablation strategy using cardiac simulator and reinforcement learning: in silico verification of principles and construction of ablation system for in vitro experiment
200441	031-1	Oral Session	Clinical outcome of catheter ablation in very elderly with persistent atrial fibrillation.
200442	037-3	Oral Session	Relationship between CHADS2 Score and Histological Fibrosis Based on Atrial Biopsy in Patients with Non-valvular Atrial Fibrillation
200443	053-3	Oral Session	Safety of Cryoballoon ablation on the Left Atrial Roof for Non-paroxysmal Atrial Fibrillation in Elderly Patients
200444	026-4	Oral Session	Intravenous vagal stimulation catheter, JOHAKU, rapidly induces bradycardia without worsening hemodynamics
200445	04-4	Oral Session	A novel pathogenic variant of SCN5A verified by functional analysis in sick sinus syndrome.
200446	014-4	Oral Session	The Characteristics of Electrocardiography in Patients with Noise Events Recorded by Wearable Cardioverter- defibrillator
200447	028-4	Oral Session	Electrogram-based feedback stimulator and simultaneous panoramic optical measurement system for validation of adaptive defibrillation strategies
200448	047-4	Oral Session	The Impact of Pulmonary Vein Potential Monitoring for the Acute Efficiency of CLOSE-guided Pulmonary Vein Isolation
200449	055-1	Oral Session	Efficacy of circumferential pulmonary vein isolation using cryoballoon ablation for paroxysmal atrial fibrillation in patients with hypertrophic cardiomyopathy: compared with radiofrequency ablation
200450	026-2	Oral Session	Utility of in vivo zebrafish cardiac assay to predict the functional impact of KCNQ1 variants
200452	044-4	Oral Session	The Clinical Characteristics and Outcome after Catheter Ablation in Young Adults with Persistent Atrial Fibrillation
200453	048-5	Oral Session	Impact of First Degree AV-Block on Outcome of Patients with Reduced Ejection Fraction Receiving Implantable Cardioverter Defibrillator
200454	041-3	Oral Session	Feasibility and outcomes of conduction system pacing for cardiac resynchronization therapy candidates
200455	037-2	Oral Session	Comprehensive Left Atrial Status Evaluation in Atrial Fibrillation; CAFS score
200456	P3-3	Chaired Poster Session	The predictors of high synchronized left ventricular only pacing rate after adaptive cardiac resynchronization therapy implantation
200457	043-2	Oral Session	Predictor of Outcome after Catheter Ablation for Atrial Fibrillation: Group Analysis Categorized by Age and Type of Atrial Fibrillation
200458	065-2	Oral Session	General anesthesia improves contact force variability and reduces gap formation in pulmonary vein isolation
200459	021-3	Oral Session	Identification of anisotropic conduction within the pulmonary veins by a differential pacing method after bidirectional pulmonary vein isolation
200460	SY6-4	Symposium : Challenges and Pitfalls of His-Purkinje Conduction System Pacing	Which is the Optimal Pacing Site in Patients with Advanced Atrioventricular Block, Para-Hisian or Infra-Hisian?
200461	030-1	Oral Session	the relationship between 3D speckle-tracking echocardiography and high-density voltage mapping in AF patients
200462	036-1	Oral Session	Comparison of Procedural Findings between 1st and 3rd Generation Laser Balloon Ablation for Pulmonary Vein Isolation in Patients with Atrial Fibrillation
200463	032-2	Oral Session	The evaluation of the effects of using amiodarone for the patients with refractory ventricular fibrillation during extracorporeal cardio-pulmonary resuscitation and target temperature management.
200464	015-1	Oral Session	Pacemaker implantation during COVID-19 period and risk factor for atrioventricular block
200465	BS2-5	Basic Researc Summit : J Wave Syndrome Summit 2022 in Japan	Risk stratification of Brugada syndrome using machine learning
200466	P10-2	Chaired Poster Session	Impact of Clinical Outcome of CARTOFINDER Guided Pulmonary Vein Isolation for Non-Paroxysmal Atrial Fibrillation

## [JHRS2022] List of Oral / Poster session

Entry No.	Abstract No.	Type of Session	Abstract title registered
200467	012-6		Left ventricular extracellular volume assessed using CMR T1 mapping associated with ventricular arrhythmia in patients with non-ischemic cardiomyopathy
200468	059-2		Contrast Filling Defects of the Left Atrial Appendage by Coronary Computed Tomography Angiography and Recurrence Rate after Catheter Ablation for Atrial Fibrillation
